

Please replace the paragraph on page 2, lines 15-21, with the following rewritten paragraph:

-- The present invention relates to electrochemical reactions in or about metals, such as palladium which has been electrochemically loaded with deuterium, but it has relevance as well, to hydrogen loading, nuclear fusion, and other reactions in loaded metals such as titanium or palladium filled with deuterium, and to the broader field of metallurgy and engineering in or about metals, including Groups IVb, Vb, and some rare earths. --

Please replace on page 2, the OTHER PUBLICATIONS list with the following rewritten list:

-- C. A. HAMPEL, Rare Metals Handbook, Reinhold Publishing Corp, (1954).

M. HANSEN, Constitution of Binary Alloys, McGraw-Hill Book Co., Inc (1958).

J. R. Melcher,, "Continuum Electromechanics", MIT Press, Cambridge, (1981).

J. O'M BOCKRIS, K.N. REDDY, "Modern Electrochemistry", Plenum Press (1970).

C. A. HAMPEL, Rare Metals Handbook, Reinhold Publishing Corp, (1954).

M. HANSEN, Constitution of Binary Alloys, McGraw-Hill Book Co., Inc. (1958).

C. J. SMITHELLS, Metals Reference Book, Butterworths Scientific, (1949).

H. H. UHLIG, Corrosion and Corrosion Control, John Wiley & Sons, Inc., (1971).

M. SWARTZ, "Patterns of Failure in Cold Fusion Experiments, Proceedings of the 33RD Intersociety Engineering Conference on Energy Conversion, IECEC-98-I229, Colorado Springs, CO, (1998B).

A. VON HIPPEL, "Dielectric Materials and Applications", MIT Press, (1954)

A. VON HIPPEL, D.B. Knoll, W.B. Westphal, "Transfer Of Protons Through 'Pure' Ice I_H Single Crystals", J. Chem. Phys., 54, 134, (ALSO 145), (1971). --

Please replace the sentence on page 4, line 9, with the following rewritten sentence:

-- FIGURE 2 is a crosssectional drawing of a lamellar reactor. --

Please replace the first two sentences on page 5, lines 5-9, with the following rewritten sentences:

-- The power supply and control unit consists of a current source and reactor control device as described in Swartz (07/339,976; 08/406,457; FUSOR power supply, JET Energy Technology, P.O. Box 81135, Wellesley Hills, MA), and are not shown in the figure. The application of said power source creates an applied electric field intensity which produces cation flow towards the cathode as described in 07/339,976, 08/406,457, Swartz, M., 1997A, "Consistency of the Biphasic Nature of Excess Enthalpy in Solid State Anomalous Phenomena with the Quasi-1-Dimensional Model of Isotope Loading into a Material", Fusion Technology, 31, 63-74, and Swartz, M., 1998A, Improved Electrolytic Reactor Performance Using π -Notch System Operation and Gold Anodes, Transactions of the American Nuclear Association, Nashville, Tenn 1998 Meeting,

(ISSN:0003-018X publisher LaGrange, Ill) 78, 84-85]. The codeposition is described in "Codeposition Of Palladium And Deuterium", *Fusion Technology*, 32, 126-130 (1997). --

Please replace the sentence on page 5, line 14, with the following rewritten sentence:

-- Figure 2 is a crosssectional drawing of a lamellar CAM reactor [Swartz, M., 1994B, "Catastrophic Active Medium Hypothesis of Cold Fusion", Vol. 4, "Proceedings: "Fourth International Conference on Cold Fusion", EPRI and Office of Naval Research; Swartz, M., 1997B, "Hydrogen Redistribution By Catastrophic Desorption In Select Transition Metals", *Journal of New Energy*, 1, 4, 26-33]. --

Please replace the 3rd sentence, 1st paragraph on page 6, lines 3-5, with the following rewritten sentence:

-- Application of the second electric field causes the deuterons already loaded in the cathode to redistribute, but the deuteron-impermeable barrier(s) act to enhance the desired reactions as described in Swartz, M., 1998A, Improved Electrolytic Reactor Performance Using π -Notch System Operation and Gold Anodes, Transactions of the American Nuclear Association, Nashville, Tenn 1998 Meeting, (ISSN:0003-018X publisher LaGrange, Ill) 78, 84-85]. --

Please replace the 3rd paragraph on page 6, lines 15-24, with the following rewritten paragraph:

-- These CAM devices are inserted, similar to a fuse onto a holding board, held in place by clips as described in 09/573,381. The three CAM device are connected to a microprocessor control system as described in 07/339,976 and 08/406,457. Said apparatus has an electrical bus to connect the anodes -which are connected to the anodic connectors (labeled 82). Said apparatus has an electrical bus to connect the cathodes which are connected to the cathodic connectors (not labelled in the figure, but of a specialized socket described in 09/573,381. The cathodic system buses are electrically shorted together during the deuterium charging. --
